Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is meant by the phrase "two lateral wings formed on the sides". Apparently there are both sides and wings. It is unclear how the "wing" is different or additive to the side. Isn't the wing the side?

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Spear.

Spear shows a jack having a main frame 11, 17, 19 having sides or wings, end plates each with a hole, a fixed member 19, a moveable member 21, a connecting member 29, a lower support member 27, and a screw 25.

Claims 2, 4, and 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
